It is Coming.

The law-abiding people of Kentucky are beginning to speak as they have never stores, on the streets, wherever men meet and congregate. You can read it in their newspapers, that at last they begin to realize their true mission as reformers. And it is time -God knows it is time! -the people and the newspapers were waking up. Grant's Sham Modesty.

[To the Editor of the Interior Journal] The possessor of only ordinary intellect never rightly realizes how feeble and insufficient are his powers of perception and reason until he measures them by those of superior beings. A striking illustration of this fact may be had by comparing the views of average mortals with those of the editor of the Courier Journal, suggested by the recent correspondence between Grant and Vanderbilt. From this editor's lofty point of observation the conduct of Grant in accepting immensely valuable gifts whilst he was in the zenith of hie military and political glory and power and in the highest state of pecuniary prosperity, was yery different from what it would have been had he accepted Vanderbilt's generous offer made to assist him as "a helpless old man overwhelmed by misfortune" and the recognition of this difference is greatly to the General's honor. Though it is darkly and dubiously insinuated that the great General did not display first-class wiedom in suffering his admiring benefac tors to bring him under great personal obligations to themselves by taking all they "conferred distinction upon the givere." the donors and the donee seems plain -Miss Bessie Stodgill, of Danville, is enough, but exactly how conferring disas again connected himself with E. Lever- the subject." He also forgets to inform us

Now, to common, worldly minded men it would seem that there is more impropriethe days of his poverty and helplessness." It looks on the surface, just a little greedy for a man to take and continue to take everything in sight, at a time when he is not in need at all, but burthened with riches, whereas it has the appearance of sham modesty for him to refuse help when he is professedly in sore need of it. It seems too, to plain people, that fifty-thousand. dollar houses, such as were donated to the hero of Appomatox and the Champion Smoker of all the Americans, were some thing more than mere "tributes to triumphe," or at least were rather costly signs of respect. And, wicked as it may be to think so, the thought can not be suppressed that the money value of the property was not entirely lost sight of by the hero and smoker aforesaid.

But for the views of the knowing editor, which, of course, must be accepted as infallibly correct, it might be imagined that certain complications with the affairs of Grant, Ward & Co., possibly had some influence in causing the refusal of Vanderbilt's generosity. History tells that the firm of Grant, Ward & Co, of which the downfall left a goodly number of its confiding creditors in a dilapidated financial condition. According to law as well as moral right these creditors have a good and valid claim against Gen, Grant for the debts due by the firm to them, for which his property is liable. The mortgage made by him to Vanderbilt was made after the firm's collapse, and for that reason it would if attached, be held to be void as an attempt to prefer creditors; and upon that determination the property mortgaged would be ordered sold and the proceeds distributed pro rata among all the creditore. So, if Vanderbilt's offered gift had been accepted by the Grants it most probably would have proven a "barren ideality," and in that event there would have been "bitterness and humiliation" sure enough-the humiliation of a conviction of attempted fraud!

The pathetic story, which the editor tells so touchingly, may be designed to amuse the House of Representatives while considering the expediency and patriotism of placing the innocent, dear, delightful, old bull dozer on the retired list at a fat salaty--who knows?

Three billion wooden toothpicks sre made annually in this country. Considering the vast number of persons who wear store testh and do not peed toothpicks. these figures are highly encouraging.

CHAPTER X.

THE SWORD FALLS.

Conce conquered-ones convinced that the obstacles which her solicitude for my welfare raised against my wish were not insuperable-Philippa offered no further resistance; while as for me, every day that might be counted before I called her my wife seemed a day spoiled, if not entirely wasted. With my mother's arguments to back my own fervent persuasion, I had no difficulty in winning Philippa's consent to our marriage taking place as soon as the needful formalities could be complied with. And yet, although the day was fixed, it

happiness was this. Knowing all that I knew, the question arose, under what name was Philippa to be married! Under her own maiden name; under the false name which for some time Sir Mervyn Ferrand, for reasons best known to himself, had made her assume; or under that name which, supposing Mrs. Wilson had spoken the truth, she was legally entitled to bear; So anxious, so resolved was I that there should be no shadow of doubt as to the validity of her second and happier marriage, that after due consideration I determined to sacrifice my own inclination, and postpone our wedding long enough to give me time to pay a flying visit to England, where I could do my best to obtain such evidence as would show that Philippa was the dead man's widow.

I made the excuse that I found many matters of business connected with my property must be attended to before I could be married. Itravelled to England-to Liverpoolas fast as I could. I stayed there for a week. and during that time made full researches into the life and death of a woman who, as Mrs. Wilson said, hat died on a certain date, and been buried under the name of Lucy Ferrand.

The information I acquired as to her antecedents is of no consequence to my story. Whatever her faults may have been, her history was a sad one; indeed it seemed to was a sad one. However, the result of my noro about her; and, stranger still, she had and troubled him. She died on the date on either hand.

For all I know to the contrary, there might be a warrant out against me. work had in any way been directed to Philhope to escape free. However, I comforted myself by thinking that if danger menaced talk with each other. as I should have heard something about it, as after our first hurried start I had made no attemp tto conceal our whereabouts. It would their unfavorable comments on the scenery, have been useless. My mother had friends or lack of scenery, it was clear that the ters. I had an agent and lawyers with bound to correspond. I had been obliged to my own face had become so tanned by the write to my stelld William, and instruct him to get rid of the cottage as best he could, ality. and to look out for a fresh place for himself. But all the same I did not care to let it be known that I was now in England.

While engaged upon raking up evidence on Philippa's behalf, I did not neglect to make such inquiries as I could respecting the event which had happened that night mear Roding. I found that, so far as the general public knew, the crime was still reiled in mystery. No one had been arrestad; no one had been accused; no reason for the deed had been discovered, and as yet is started and opened my eyes. Philippa's head was stretched forward as if she was intent upon catching some expected words government, it seemed that Sir Mervyn spoken by another. Perrand's murder was relegated to swell the list of undiscovered crimes. By this I knew that Mrs. Wilson had kept her promise of silence; and now that months had gone by; now that public attention had been turned from the thrilling affair; now that Philippa

ing of recollection of what her wrong, her frenzy, had prompted her hand to do unknowingly, I dared to hope that any chance which remained of a revelation of the truth was reduced to a minimum. These results of my investigations and inquiries gave me immense relief, and my heart was all but gay as, armed with the proofs of the first Lady Ferrand's death, I hurried back to Seville, Philippa, and the happiness which I vowed should be mine.

We were married. Philippa and I were married! Married; and a few months ago I sat lonely, miserable and heart-broken, deeming that the one I loved was lost to m forever! What matters the things which ave filled those months, and made them the most painful of my life? To-day we are man and wife, joined together till death us

I said no word as to the result of my inquiries in Liverpool. I had no difficulty in persuading Philippa, who in some things was as simple and trusting as a child, that it was necessary, or at least advisable, she should be married under the name which her first certificate of marriage affected to bestow upon her. She signed her name for the last it may, for aught I know, have alse been the first time, as Philippa Ferrand; and I noticed that she shuddered as she formed the letters.

Although my bride was by birth half a Spaniard, and although I had by now in many ways conformed to the Spanish mode of life, we were still English enough to look upon going away somewhere for a honey moon as indispensable. It would be but t short trip; and as my mother in our absence would be left at Saville alone, or with the cervants only, we did not care to go very far away. It so happened that, although so close to Cadiz, we had not yet paid that town a visit, and thought the present a cap ital opportunity for so doing.

To Cadiz we went, and stayed several days at the Hotel de Paris We liked the white walled town, rising and shining above the dark blue sea, like, as I have somewhere seen it described, a white pearl in a crown of sapphires; or, as the Gaditanos call it tazita de plata, a silver cup. We liked the rows of tall terrace topped houses. We liked the movement and bustle on the quay and in the port. We liked the walks on the broad granite ramparts, and the lovely view of the busy bay and country beyond it; but all the same we agreed that Cadi: bore no comparison to our beautiful Seville, and the sooner we returned to that gay city the better.

Now that I had gained my desire, was ! happy? After all that had passed, could ! have been happy during those early days of our wedded life? As I look back upon them I sit and muss, trying in vain to answer the question to my own satisfaction. Philipps loved me-she was my wife; come good, come evil, sha was mine forever. In so much I was happy, thrice happy. Could I have lived but for the present my bliss would have known no alloy.

But there was the past! I could not altogether forget the path which had led to such happiness as now was mine. I could be thankful that I alone knew all the horrors and dangers with which that path was studded. I alone knew the secret of that one night. Although I could keep it for ever, would it be always a secret?

Yes, and there was the future. Behind the happiness which was mine at present lurked a dread as to what the future had in store for me-for us. It was a dread which day by day grew stronger. The greater my happiness the more dreadful the thought of its being wrecked. The feeling that my house of joy was built upon sand was always obtruding on my most blissful hours, and not, I knew, without good reasons.

Philippa's very avoidance of speaking of was at my instance changed, and the cere-mony postponed for awhile. her past life lent some justification to my gloomy forebodings. Not once did Sir Meryn Ferrani's name pass between my wife and me. Not once did she ask me for any further particulars concerning the events of that night upon which, in the height of her short lived mania, she reached my cottage. True that upon becoming my wife, and beginning a new and happier stage of life, it might be but natural for her to wish to consign to oblivion the wrong, the shame, the suffering wrought by a villain's craft; yet l was so mixed up in the catastrophe that silence on the subject seemed strange. Her reticence alarmed me. I fancied it must be caused by some vague uneasiness connected with that night-some doubt which she dared not seek to set at rest. It is, I know, not unusual for women, after their recovery from that mysterious disease which had for awhile driven my poor girl distraught, to be able to recall and accurately describe the delusions which had afflicted them during those wandering hours. I myself had in one or two cases noticed this peculiarity, and the authorities which I had studied during Philippa's liness mention it as an indisputable fact. My great dread was that at some moment perhaps when our happiness was as perfect as it could be, some simple chance, some allusion to certain events, even the bare mention of a name, might supply the missing link, and the fearful truth would berevealed to my wife.

Our return journey to Seville was made by water. Although the Guadalquiver is me that the history of any woman who had not a very interesting river, we thought been cursed by Sir Mervyn Ferrand's love travelling by steamer would be a pleasant change from the journeys in the hot, stuffy, investigations was, in short, this: Ferrand slow trains, full from end to end with the had married the woman many years ago. odor of garlic and tobacco; so early one They had parted by mutual consent. For some time I listened with great amusement; then the lulling motion of the steamer, the sluggish muddy flow of the stream, the mo-notonous banks past which we stole, exercised a soporific effect upon me, and I began to doze and dream.

Through my dreams I heard a name, s hated name, spoken clearly and distinctly.

"Sir Mervyn Ferrand," I heard one of our

She made a motion of dissent. Again urged her. She shook her head pettishly. "Ah! I forgot where you have been for months," said the second tourist, laughing; "out of the pale of civilization and newspapers. Well, Ferrand was murdered-shot

The moment I had so long dreaded had come. It I dragged her away by forcs-if I interrupted the speakers-what good could it do? She had heard enough. She would force me to tell her the rest. I could only pray that she would in no way associate herself with the man's death.

"Murdered! Poor fellow! Who murder ed him?" I heard the first speaker say. "No one knows. He was shot dead on a country roadside just as that fearful snow storm of last winter began. It seems almost incredible, but the snow drifted over him. and until it melted the crime was not discovered. In the interval the murderer had, of course, got clean away.'

"Poor devil! I never heard any good of him; but what an end!" I was not looking at the speakers. I was noting every change in my wife's face. I saw the color fly from her cheek. I saw her

Then, with a low moan, she sank white and senseless on may

Though in a whirl of despair, I believe that I assumed a kind of mechanical calm. I seem to remember that the two English tourists offered their assistance; that, as we bore Philippa to an extemporized couch in the shadiest and coolest place we could find, I smiled, and attributed my wife's fainting nt to the heat of the sun, the smell of engines, or something of that kind. Little did those young men guess what their chance words had wrought. Little could they think that in speaking of Sir Mervyn Ferrand's death they had, perhaps, wrecked the happiness of two lives. My heart was full of grief and fear, but I believe I bore myself bravely.

In spite of such restoratives as we could administer, Philippa's swoon lasted for a considerable time. I troubled little about that fact. Indeed, to me it seemed well that syncope should have supervened, and, for a time, banished the dreadful memories which had so sudeenly invaded her brain. Could such a thing have been possible, I would almost have wished that her insensibility would continue until we reached Seville. But it was not to be so. By and by she sighed deeply, and her eyes opened. Consciousness and all its dreaded sequence was hers once

I spoke to her, but she made no reply. Sh turned her eyes from mine; she shunned my gaze; she even seemed to shrink from th touch of my hand. During the remainder of that dreary journey not one word passed her lips. She lay with her face turned to the side of the vessel, heedless of the curious glances from fellow-passengers, heedless of my whispered words of love; heedless of all her, I trembled to picture whither.

Through all those long sultry hours, while

the wretched steamboat plowed its way up the broad muddy stream, I sat beside her, the broad muddy stream, I sat beside her, trying to find some way out of our sorrow. Alas! every road was stopped by the impassable obstacle of Philippa's knowledge of what she had done. For she knew it, I was certain. That look in her eyes had told me so much. The duration of her insanity had been so short that I could gather no comfort from the fact that by some merciful arbeen so short that I could gather no comfort from the fact that by some merciful arrangement maniacs who recover their erring senses are troubled little by the deeds they have done in their moments of madness. I felt that in my wife's case my only hope was to endeavor by argument to bring her to my own way of thinking; that is, to consider herself unaccountable by any law, human or divine, for her actions at the time. But I doubted if her sensitive, impulsive nature could ever be induced to take this view of her act. I doubted, had she not been the woman I loved with a passionate love, if I could have quite absorbed her from the crime, with the remembrance of her words, "Basil, did you ever hate a man?" still with me. man?" still with me.

Yet, strange anomaly, I would, in fair fight, of course, have shot that man through the heart and have gloried in the deed. then Philippa was a woman, and had she not been the woman I loved I might have shrunk from the one who, even in her mad-ness, was urged to take such fearful ven-

I smiled bitterly as I thought how a chance breath of wind had tumbled my house of cards to the ground. I smiled almost triumphantly as I told myself that, come what might-misery-shame-death-I had won and held for a week the one desire of my Nothing could deprive me of that

Home at last! Still silent, or answering my questions by monosyllables, Philippa was brought by me to our once happy home in Seville. My mother with arch smiles of welcome on her comely face, was at the gate of the patio ready to receive us. As she saw her a kind of shiver ran through my poor love's frams. She let my mother embrace and caress her without any display of receprocal affection.

"Procal affection.
"Philippa is ill," I said, in explanation.
"I will take her to her room." I led her to the apartment which my mother had in our absence fitted up for us. It was gay and beautiful with flowers, and there were many other careful little evidiences of the hearty welcome which was waiting us. Philippa noticed nothing. I closed the door and turned toward my wife. She looked at me with those wondrous dark eyes, which seemed to search my very soul. "Basil," she said, in a low, solemn voice, "tell me—tell me the truth. What had I done that night?"

Old Beaus.

[New York Letter.] It was a fair young attendant at this same Astor wedding who proposed something quite revolutionary in society. "O, I had a pretty good time," she said, "but was awfully bored by three men who were 50 years old apiece. There ought to be some severe means taken to free girls from the old beau bores. When a woman gets past 40, and isn't married yet, she gives it up, and lets the young fellows alone, or, if she does undertake to impose herself upon them, they don't hesitate to snub her. But look at the case of we girls. We're not allowed to turn our backs on the ante-deluvians who beset us, but are, by polite usage, compelled to display in smiles the teeth which we'd like to bite them with.
